

TURBOANALISIS, INC.

DELIVERING SUPERIOR QUALITY PARTS AND SERVICES TO THE AVIATION INDUSTRY

Total Customer Satisfaction

Since 1988, TURBOANALISIS, INC. has earned the trust of our worldwide customers by successfully delivering quality parts and services to the aviation industry. Our goal is to provide unsurpassed assistance to our valued customers with their daily maintenance needs, comprehensive parts provisioning and A.O.G. requirements. TURBOANALISIS, INC. offers a variety of long and short term ordering agreements that support various types of airframe and engine materials. We support all types of airlines, major repair stations, overhaul centers and numerous air forces around the world.

Worldwide Service

We service out customers from our main headquarters located in Phoenix, Arizona, U.S.A. and through a network of international sales representatives. Our 50,000 sq. ft. facility is equipped with more than 60,000 line items of airframe and aircraft engine materials. Our close proximity from Phoenix Sky Harbor International Airport guarantees that we can quickly and easily ship on demand.

QUALITY ASSURANCE POLICY OF TURBOANALISIS, INC.

"To continually improve our quality system and to provide the highest quality material and service to our valued customers in a prompt and cost-effective manner."

TURBOANALISIS, INC. is ISO 9001:2008 certified, and we are a member of the Airline Suppliers Association. As a supplier of new, serviceable, and overhauled material, we guarantee that all material delivered meets or exceeds FAA, EASA, CAAC, DOD, and other international quality standards. All material is received and shipped only after our rigorous inspection and quality assurance processes have been performed. The effectiveness of our quality control program is validated by the outstanding grades we receive on our ISO quality control surveys.

SERVICES SUPPORTED

As a full service provider, our team of experts can support all phases of overhaul and maintenance.

Parts Sourcing and Procurement

A single procurement source allows our customers to consolidate purchasing and freight activities. This provides our customers with reduced turn times and substantial savings in purchasing and freight costs.

Consignment Inventories

Consignment inventories allow for zero inventory carry costs and help our customers improve their overhaul turn times. Immediate availability of items to meet our customers' daily maintenance and critical needs ensure shipment without delays.

Repair Management

Our valued customers depend on our technical expertise to source and manage a variety of their aircraft and aircraft engine components. All material is overhauled in accordance with the appropriate technical specifications and manuals. Our repair management activities enable our customers to focus their efforts on other important activities.

Basic Order Agreements

Prices are firm and fixed for a pre-determined period of time. Ordering agreements allow our valued customers to better meet their financial objectives.
